

Eduék Akpan-Nyah

FRONTEND DEVELOPER

I enjoy translating art to code, building amazing, scalable web products with intuitive user experiences. I am an ardent team player and I look forward to promptly delivering my possible best on every project I am involved in, providing digital solutions to real world problems.

WORK EXPERIENCE

Frontend Intern / HNG Internship

08/2021 – 09/2021 • Remote

Involved in the development of the frontend infrastructure of Zuri chat bot. Translating Figma designs to code.

PROJECTS

CryptoTracker

the-eduek.github.io/cryptotracker

Designed and developed a web app that allows users to get data about cryptocurrencies by total market volume and add promising currencies to a watchlist.

Stack: Vue.js & Vuex, Tailwind CSS.

MoviesNextDoor

the-eduek.github.io/moviesnextdoor

Designed and developed a landing page for a movie streaming service, largely inspired by Netflix.

Stack: Sass, Vanilla JS.

Gbalé.ng

the-eduek.github.io/gbale

Reimagined and developed the landing page for Gbalé.ng, with page transitions and animations.

Stack: Sass, GSAP, Vue.js.

eduek.xyz

eduek.netlify.app

Designed and developed my personal portfolio website.

Stack: Nuxt.js, Sass.
